🔗 Shawn-S677

- **Professional Summary:** Full Stack Software Engineer with **7+ years** of experience building enterprise web applications, with a primary focus on **Angular (v8–21)** frontend development and supporting Java/Spring Boot API integration.
- **Angular Expertise:** Strong experience delivering responsive single-page applications using **TypeScript, RxJS, Angular Signals, Reactive Forms, route guards, lazy loading, reusable components, and Angular Material.**
- **Frontend Delivery:** Built document workflows, CRM-style dashboards, large data tables, dynamic forms, accessibility-focused interfaces, and role-based user experiences for operational business teams.
- **Performance & Accessibility:** Applied **lazy-loaded feature routes, Angular CDK Virtual Scroll, and SSR/Hydration** for data-heavy and published-content views, with keyboard navigation, ARIA labels, focus management, and clear validation feedback.
- **Full Stack Integration:** Integrated Angular applications with **REST APIs provided by Java/Spring Boot services**, server-sent status updates, and MySQL/Redis-supported data flows.
- **Cloud Exposure:** Participated in frontend-facing integration with **AWS S3** document storage, **EC2**-hosted application environments, and **CloudWatch** troubleshooting for enterprise document workflows.
- **Secure Enterprise UI:** Implemented **JWT-aware authentication flows, HTTP interceptors, route guards, and permission-based rendering** to support secure reviewer, billing, and administrative workflows while relying on backend services for final authorization enforcement.
- **Quality Practices:** Applied unit and end-to-end testing practices using **Jasmine/Karma** and **Playwright**, alongside Git-based collaboration, CI/CD, and Agile/Scrum delivery.

SKILLS

Frontend	Angular (v8–21), TypeScript, JavaScript, RxJS, Angular Signals, HTML5, CSS3/SCSS, Angular Material
Angular Development	Reactive Forms, FormBuilder, FormArray, Route Guards, Standalone Components, Lazy Loading, SSR/Hydration, CDK Virtual Scroll
Frontend Architecture	Micro-Frontends with Webpack 5 Module Federation, Nx Monorepo, Shared Component Libraries
Backend Integration	Java/Spring Boot API Integration, REST APIs, SSE Consumption, Authentication-Aware UI Flows, JWT-Based Authentication Context
Data & Cloud Exposure	MySQL, Redis Exposure, AWS {S3, EC2, RDS}, CloudWatch
Testing & Delivery	Jasmine/Karma, Playwright, Git, CI/CD, Agile/Scrum
AI-Assisted Features	RAG-Supported Document Search and Summary UI Exposure

TECHNICAL EXPERIENCE

Full Stack Software Engineer / Contract & Policy Document Platform

Sep 2024 — Mar 2026

Adobe Inc.

Chicago, IL

Built a document workflow platform for enterprise compliance teams to upload contracts and policies, review metadata, approve published content, and quickly locate relevant document evidence.

- Developed review queue, document detail, and approval workflows using **Angular 18 Standalone Components** and TypeScript, supporting upload tracking, metadata review, role-based actions, and published policy views.
- Built dynamic metadata forms with **Reactive Forms, FormBuilder, FormArray, and custom validators** for document types, jurisdictions, tags, and contract effective/expiration dates.
- Implemented route guards and permission-aware UI rendering using **JWT role context** for reviewer, approver, and admin functions, including protection against leaving unsaved multi-step review forms.
- Used **Angular Signals, RxJS, and SSE consumption** to display backend-provided document processing status updates across queue and detail views.
- Applied **SSR/Hydration** to published policy and shared document preview pages, and improved usability with keyboard navigation, ARIA labels, focus states, and validation feedback.
- Integrated Angular workflows with **Java/Spring Boot REST APIs** and participated in frontend integration with **AWS S3** document storage, **EC2**-hosted application environments, and **CloudWatch** troubleshooting.
- Contributed to a **RAG-supported document search and summary UI**, presenting backend-provided results and clickable citations that navigated users to relevant PDF passages.

Full Stack Software Engineer / CRM Customer Operations Platform

Oct 2021 — Jun 2024

Verizon Communications Inc.

Piscataway, NJ

Built an internal customer operations platform enabling support and billing teams to search accounts, review customer profiles and usage, and manage billing case workflows.

- Developed customer search, Customer 360, usage, and billing case screens using **Angular 14–15**, TypeScript, and Angular Material for internal operations users.
- Organized enterprise SPA workflows with lazy-loaded feature routes, reusable data tables, dashboard widgets, and shared form controls across support and billing modules.
- Implemented **Reactive Forms** for multi-field customer and billing searches, using RxJS services to preserve query criteria, selected customer state, loading indicators, and error messages.
- Built HTTP interceptor and route-authorization flows to attach **JWT authentication context**, normalize API errors, and control access to billing and admin functions.
- Integrated Angular screens with **Java/Spring Boot REST APIs** serving customer and billing data from **Amazon RDS for MySQL**, and consumed Redis-supported reference values for filters and dropdowns.
- Improved accessibility through consistent labels, keyboard navigation, focus management, loading states, empty states, and validation feedback throughout high-use workflows.
- Added **Jasmine/Karma** unit coverage for form and navigation behavior and **Playwright** workflow coverage for customer search, profile review, and billing case navigation.

Full Stack Software Engineer / Market Data Operations Platform

Oct 2019 — Aug 2021

Bloomberg L.P.

New York, NY

Built internal market data operations interfaces for analysts to monitor data feeds, filter large exception queues, review details, and track investigation status.

- Developed feed monitoring dashboards and exception review screens using **Angular 10–12**, TypeScript, RxJS, and Angular Material table components.
- Built filter and triage workflows with Reactive Forms for symbol, feed source, date range, status, and exception-type criteria used by operations analysts.
- Introduced **Angular CDK Virtual Scroll** for large exception queues so screens rendered visible rows efficiently while analysts navigated high-volume records.
- Created reusable status indicators, detail panels, and saved-filter controls to improve consistency across data monitoring and investigation views.
- Implemented navigation protection for unsaved investigation notes and status edits, and integrated UI flows with REST APIs for queue and detail data.
- Improved accessibility of dense data screens with clear table headers, keyboard-visible focus, text-based status indicators, and readable validation/error feedback.

Full Stack Software Engineer / Pricing & Invoice Workflow

Sep 2018 — Aug 2019

Tencent Holdings Ltd.

Shenzhen, China

Built cloud billing workflow screens for product operations and finance users to configure pricing, review invoice line items, submit adjustments, and track approvals.

- Developed pricing setup and invoice review screens using **Angular 8** and TypeScript, supporting product configuration, adjustment requests, and approval workflows.
- Built dynamic forms with **FormBuilder**, nested FormGroup structures, FormArray line items, and custom validation for prices, discounts, and invoice adjustments.
- Implemented guarded routes, permission-based menus, and reusable stepper components to support finance and product operations tasks.
- Created reusable form controls, validation messages, and confirmation states to make complex multi-step billing submissions clearer for internal users.
- Integrated frontend pages with REST APIs for pricing, invoice data, and approval status, coordinating request formats and error handling with backend team members.
- Participated in code reviews, sprint planning, and QA validation for stable releases of internal billing workflow screens.

EDUCATION

Northwestern University

Master of Science in Computer Science

Evanston IL

Rutgers University

Bachelor of Science in Computer Science
